Instructions for using this library

This library is developed for sharing important regulatory documents among regulators in Member States of the IAEA, and has restricted access only to staff of regulatory bodies in Member States. Therefore, if you are staff of a regulatory body for radiation safety in your country and you would like to participate in this library (view, download, or upload documents), you need to get registered in the IAEA Nucleus.

For instructions on how to register for using the Control of Sources Network (CSN), please follow the steps in the link *How to register to CSN services* on the home page of CSN. Once you are provided with a user name and password, send an email to *CSN coordinators,* with your username indicated, using the link under 'contact' at the right-bottom of the home page, and you will be contacted by email for your access rights.

Please note that if you are a registered user in Nucleus, you do not need to register again and only send an email to *CSN Coordinators*.
