

Quick Installation

If you are not familiar with RAIS 3.1 Web yet, we strongly recommend reading the documents ***RAIS 3.1 Web Regulatory Model***, ***RAIS 3.1 Web Administrator's Guide – Part I*** and ***RAIS 3.1 Web User's Guide*** before installing RAIS 3.1 Web.

Please note before installing RAIS 3.1 Web, there are some software requirements to allow RAIS 3.1 Web to install and run. The following should be already installed and configured for a standard web application:

- .net framework 3.5 (Freely available from Microsoft)
- Microsoft Report Viewer 2008 Distributable (Freely available from Microsoft)
- MS SQL Server 2005 (Any version) (Freely available from Microsoft)
- IIS 5.1 (or above)
- MS SQL Server Management studio (Freely available from Microsoft)
- Latest service packs and patches from Microsoft

The following Service must be started manually for the first time and set to Automatic; this service is “off” by default.

- Distributed Transaction Coordinator (MSDTC)

After the above requirements have been installed and configured, you can proceed with the installation of RAIS 3.1 Web.

1 ***Installing RAIS 3.1 Web.*** Installation is started by executing ***RAIS.msi*** on the installation CD-ROM or from the download location. The *Windows* user executing the file ***RAIS.msi*** must be granted administrative rights on the server. If you have no administrative rights, please contact your system administrator. Multiple arguments are proposed during the installation of *RAIS 3.1 Web*. Please provide the requested information then continue. Once the installation is complete, RAIS database will be installed along with all the code files needed to run *RAIS 3.1 Web*. The physical code files after installation can be found here C:\Inetpub\wwwroot\RAIS. RAIS 3.1 Web can be launched by using this URL in IE6 or above “localhost\RAIS” (If a different location was specified during installation then replace the “RAIS” part for the location you specified).

Notes

*No passwords have been set for the current version of RAIS 3.1 Web; they all are blank. Do not enter any characters (even not spaces or tabs) when asked for a password. Simply enter the user name of “Administrator” or “Guest” then press the **Enter** key or click the **Login** button.*
