Ministry of Health of the Republic of Belarus (MH RB)

(from the Regulations on the Ministry of Health of the Republic of Belarus)

- The Ministry of Health of the Republic of Belarus is a republican body of the state administration and is subordinated to the Council of Ministers of the Republic of Belarus.
- The main aims of the Ministry of Health are as follows:
  - implementation of a state policy in the field of public health;
  - provision of medical care in the republic, provision of the state-guaranteed free medical care at the state health care institutions;
  - preventive activities, formation of healthy lifestyle, public health education;
  - provision of favourable sanitary-and-epidemiological conditions for the population;
  - continuous improvement of the quality of medical care as well as the increase of its efficacy.
- The Ministry of Health fulfils its activity in cooperation with Ministries and other republican state authorities, Soviets of Deputies, local executive and administrative authorities, international organizations and other legal entities.
- The Ministry of Health governs the public health through Regional Health Care Boards and through the Health Care Board of the Minsk Municipal Executive Committee as well as through instructions for local entities, subordinated to the Ministry of Health.
Welcome to the National Academy of Sciences of Belarus!

The National Academy of Sciences of Belarus (NAS of Belarus, or NASB) is the highest state scientific organization of the Republic of Belarus, a country in the middle of Europe. The National Academy of Sciences is reported to the President of the Republic of Belarus, accountable to the Council of Ministers of the Republic of Belarus and carries out the organization and coordination of fundamental and applied research performed by all subjects of scientific activities, provides fundamental and applied research and developments in the main directions of natural, engineering, social sciences, the humanities and arts with the purposes of obtaining new knowledge about human, society, nature and artificial objects, increasing the scientific and technical, intellectual and spiritual potential of the Republic of Belarus. The National Academy of Sciences carries out the organization, conduction and coordination of the state of scientific expertise, pursues common state policy, coordination and state regulation of activities of organizations in the exploration and use of outer space for peaceful purposes, serves as an umbrella organization of Belarus on scientific and methodological support of informatization development, and also carries out, accordingly to the Law of the Republic of Belarus "On the National Academy of Sciences of Belarus", some functions of a republican body of state management in the field of science.

Field of Activities
- Fundamental and applied research in the fields of nuclear physics, elementary-particles physics, high-energy physics.
- Research and developments in the field of nuclear and radiation technologies, nuclear power in the interests of national economy.
- Research and development of technologies of man-caused risks minimization

Subdivisions
Laboratories of nuclear and environment technologies: simulation of the process of pollution transfer in the environment; rehabilitation of contaminated territories; radiation and chemical research of the environment; radionuclides (metal ions) forms in solutions; equipment of nuclear energy facilities and resource saving technologies: experimental nuclear and physical research and expert analysis of radioactive material; radiation, energy and technological studies; energy-transfer agent (working medium) properties and technologies and management with radioactive waste; strategic research of the energy sector; simulation of non-linear processes in power engineering; nuclear reactors physics; economical, physical and technical research of power plants problems; neutron physics; systems analysis and evaluation of man-caused risks; nuclear and physical constants; radiation and chemical processes; strong interaction; experimental physics sector and reactors nuclear safety

LEGAL SYSTEM

The legal system of any state reflects objective laws of the development of society, as well as, its historical, national and cultural peculiarities. The Republic of Belarus, like any other state, has its own legal system which has both common features with the legal systems of other countries and its own special characteristics.

Analysis of the origin and development of the legal system of the Republic of Belarus demonstrates the fact that the content and the dynamics of this system are being affected not only by politics and political culture but also by the entire cultural wealth of society: religion, philosophy, morals, artistic culture and science. It goes without saying that the evolution of the legal system of Belarus has a tight connection with economic factors - such as, the development of productive forces and labour-management relations, as a result of appearance of market economy. Needless to say, that the continuing development of legal systems outside Belarus influences the formation of the legal system in our country, for example, our traditional legal values interact with new legal values taken from foreign legal systems. Undoubtedly, interaction of our legal system with others will make progress.

It's generally known that all legal systems can be categorized into groups ("law families") depending on some common features. The legal system of the Republic of Belarus, as well as, legal systems of the other states of continental Europe belongs to the Roman-Germanic Law Family. Roman Law (jurisprudence of Ancient Rome) is the primary source of this law family. The main characteristics of the Roman-Germanic Law Family are: optimal generalization of the rule of law, the division of law into public and private law. A normative legal act is the main legal source in countries with legal systems based on the Roman-Germanic Law Family unlike those countries with legal systems based on the Common Law Family.

Although the first steps of state system formation in the Belarus were made only at the beginning of the 20th century, the legal system of our country has profound historical roots. The sources of Belarusian Feudal Law rank high among the world's other famous ancient legal sources, (such as the Code of Hammurabi, the Law of the Twelve Tables, the Justinian Code, and the Napoleonic Code). The aforesaid statement refers to the famous Statutes of the Grand Duchy Litovskoe of 1529, 1566 and 1588 years. The Statutes of the Grand Duchy of Lithuania of 1588 used to be the enforced law and the entire legal system of Belarus and Lithuania was based on the Status within these statutes for 250 years. The Polish Constitution of 1791 also should be mentioned here as a remarkable legal document, significant in the history of the development of the Belarusian legal system. This Constitution along with American and French Constitutions can be described as the most progressive documents of 18th century.

The legal system of the Republic of Belarus was essentially influenced by those states, which influenced our country in particular historical periods (Poland - during the 17th-16th centuries and Russia - during the 19th-20th centuries). During the most part of the 20th century, Belarus was a part of the Union of Soviet Socialist Republics (USSR) and this fact surely affected the legal system of today's Belarus (its legal culture, formation of the branches of law, etc.) After the break-up of the USSR, the legal system of the Republic of Belarus segregated from the Socialist Law Family.
ABOUT THE NATIONAL REGISTER OF LEGAL ACTS OF THE REPUBLIC OF BELARUS

The National Register of Legal Acts of the Republic of Belarus (further – National Register) was created on January 1, 1999 in accordance with the Edict of the President of the Republic of Belarus No. 369 of July 20, 1998 “On the National Register of Legal Acts of the Republic of Belarus”.

This is a registration system of legal acts of the Republic of Belarus.

The status of the National Register defining the order of its formation and management is determined by the Regulations on the National Register of Legal Acts of the Republic of Belarus approved by the mentioned Edict. The National Center of Legal Information of the Republic of Belarus is responsible for its management.

The National Register consists of nine sections, each of which contains legal acts of a specified kind. The following acts are subject to inclusion into the National Register:
- The Constitution of the Republic of Belarus;
- Decisions of republican referenda;
- Decrees, Edicts, Executive Orders of the President of the Republic of Belarus;
- Laws of the Republic of Belarus;
- Treaties of the Republic of Belarus;
- Decisions of the House of Representatives and the Council of the Republic of the National Assembly of the Republic of Belarus;
- Decisions of the Government of the Republic of Belarus and Executive Orders of the Prime-Minister of the Republic of Belarus;
- Resolutions and other decisions of the Constitutional Court, except for inquiries, requirements and other procedural decisions;
- Acts of the Plenum of the Supreme Court on application of Belarusian legislation, arising at legal proceedings;
- Acts of the Plenum of the Supreme Economic Court on application of Belarusian legislation in the sphere of entrepreneurial and other economic activity in the territory of the Republic of Belarus;
- Legal acts of the Administration of the President of the Republic of Belarus, unless otherwise provided by the Head of the Administration of the President of the Republic of Belarus;
- Normative legal acts of state bodies directly subordinated to the President of the Republic of Belarus, except for the Administration of the President of the Republic of Belarus;
- Normative legal acts of the National Bank, the National Academy of Sciences of Belarus, ministries and other republican bodies of state administration;
- Normative legal acts of oblast, Minsk City Council of Deputies, oblast executive committees, Minsk City Executive Committee, local councils of deputies, executive and administrative bodies of base level;

About the Fund

National Fund of TNLA

The Decree of the President of the Republic of Belarus dated 16.07.2007 No. 318 "On the order of making technical normative legal acts available for public" has entered into force on 23.01.2008. This Decree was signed with a view to provide legal and natural persons with complete, reliable and updated information about technical normative legal acts. With the purposes of this Decree implementation the following acts have been adopted:

- Resolution of the Gosstandard dated 30.10.2007 No. 55 «On approval of the Instruction on the order of information provision about technical normative legal acts for creation of the National Fund of Technical Normative Legal Acts and united reference data bank of legal information"
- "Instruction on the order of information provision about technical normative legal acts for creation of the National Fund of Technical Normative Legal Acts and united reference data bank of legal information"

In compliance with this Decree the National Fund of Technical Normative Legal Acts (National Fund of TNLA) was established, which embraces both technical normative legal acts in the field of technical regulation and standardization and aviation regulations, sanitary, hygienic...

Правила от 28.09.2010 № 47

МИНІСТЕРСТВА
ПА НАДЗОРУ НА ЧЛЕНІВ СІТУАЦІЙ
РОСБУРПІК МІНСК

ПАСТАНОВА

28 вересня 2010 № 47
г. Мінск

Об утверждении норм и правил по обеспечению ядерной и радиационной безопасности «Безопасность при обращении с радиоактивными отходами. Общие положения»

На основании статьи 6 Закона Республики Беларусь от 5 января 1998 года «О радиационной безопасности населения» Министерство по чрезвычайным ситуациям Республики Беларусь ПОСТАНОВЛЯЕТ:

1. Утвердить прилагаемые нормы и правила по обеспечению ядерной и радиационной безопасности «Безопасность при обращении с радиоактивными отходами. Общие положения».

2. Настоящее постановление вступает в силу с 1 января 2011 г.
Thank you for your attention.
