

International Conference on Human and Organizational Aspects of Assuring Nuclear Safety

-

Exploring 30 Years of Safety Culture

Closing Statement

DDG Nuclear Safety and Security Department

Juan Carlos Lentijo

IAEA

International Atomic Energy Agency

Looking back

- Conference has been an opportunity to examine the **practices and status of progress** around Human and Organizational aspects.
- Looking at the lessons learned and how they link back to the **human realities** associated with serious accidents, and day to day realities of assuring **nuclear safety**.

Looking Forward

- From Safety Culture to **Culture for Safety and Security**
- Identifying **practical programs and practices** that can make a difference to an Organization and avoid 'Hyper Culture'.
- Taking a **Systemic Approach to Safety**
- Recognizing that in complex systems **collaboration with all players is necessary to assure safety.**

The IAEA will take the findings from this conference and develop a plan of action to address the outcomes of the conference
