

BIOGRAPHY

1. Name: CAO DAT KHOA

2. Formal background/education

- Doctor of Philosophy in Business Management;
- Master in Economics of Development;
- Post Graduate Diploma in Development Planning Technique;
- Engineer in Electric Power Network;

3. Work experience

I am deputy director of the Organization and Human Resource Department, Vietnam Electricity. I have over 19 years experience in the Electric Power Sector and have completed several core tasks on the planning, economic estimation, organization, human resource training and development.

I have been working in EVN as the leading state-owned economic groups and have long time cooperated with the ASEAN power electric utilities/authorities (HAPUA). I had participated in the HAPUA for the human resource training and development and the Electric Service Industry. In regard to the international cooperation, I have had a wide range of experience in managing and implementing international projects covering many aspect of the Electric Power Sector activities sponsored by the World Bank (WB), the Asian Development Bank (ADB), the Swedish International Development Agency (SIDA), the Japan International Cooperation Agency (JBIC), the United States Trade and Development Agency (USTDA), the United States Energy Association (USEA), etc.

I have been also mandated as EVN authorized representatives in the shareholding company to implement its rights in the company. I have been appointed as the member of the Management Board of Avuong Hydro Power JSC., and Saigon VINA Land JSC., at the same time.

Under the wave of electric power reform all over the world, I have been deeply involving in studying electric power development of different models from monopoly to competitive, from bundle to unbundle models. Through participating in not only studying but also managing and directing reform roadmap, I have been grasped what should be prepared for the future of EVN in special and power sector in general as well.

4. Personal definition of safety culture

Safety culture is a system of material and spiritual values, standards, principles and rules of conduct to regulate the organization and human being's behaviors in order to achieve the safe and sustainable development of the socio-economic and natural environment.
