

Name: Eduardo Souza Motta.

Formal education: Electrical Engineer with doctor degree in Power Electronics.

Work experience: Mr. Motta has worked for six years in Nuclear Fuel Fabrication Plants (Enrichment, UO₂ Conversion, Pellets, Components and Fuel Assembly). From 2010 and up to now he has been working at Brazilian Nuclear Energy Commission (CNEN) as a staff member of the regulatory body team responsible for licensing and supervision of the nuclear fuel cycle facilities.

Personal definition of safety culture: For Mr. Motta safety culture is the commitment that people of a nuclear installation perform their activities, since they know the relevance of this in the safety of the installation
