RSLS Canadian Legacy Sites Tour and Workshop 2014

April / May 2014
Tentatively

- 2 days of closed mine tours
- 2 days of workshop
Location

- Elliot Lake, Ontario was home to 12 mines, 10 mills.
- The last remediation was completed in the late 1990s.
- Currently being managed by Rio Algom and Denison Mines.
Elliot Lake is located here.

- 540 km NW of Toronto
- 650 km W of Ottawa
- 161 km W of Sudbury
- 3800 km E of Vancouver
- 2900 km E of Banff
- 3400 km W of St. John’s
Workshop - Day 1 - AM

• 1. CNSC - Introduction and framing of issues
• 2. RSLS - The mandate of the group, a summary of work and anticipated deliverables.
• 3. NOAMI - Intergovernmental initiative studying legacy mine problems across Canada
• 4. NRCan - Policy and funding approach to Federal legacy and shared legacy sites
•  Short break
• 5. Denison - non-legacy, Elliot Lake decommissioned sites - some provincial government liabilities, financial assurances
• 6. Rio Algom - non-legacy, long-term management of tailings sites
•  Lunch
Workshop - Day 1 - PM

- 7. EWL - non-legacy, Bancroft decommissioned sites - perpetual management, financial assurances
- 8. Country case study - uranium contaminated sites
- Short break
- 9. Open discussions on the days issues
Workshop Day 2 - AM

• 10. CNSC - Regulatory requirements under the NSCA and Legacy site approaches
• 11. ECON - Saskatchewan Institutional Controls Program
• 12. SRC - meeting modern requirements, legacy problems
• 13. Cameco - Beaverlodge - Federal government Legacy site, managed by Cameco, decommissioned in 1982, changing regulatory requirements
• Short break
• 14. INAC - Port Radium, CDUT and issues related to local involvement in planning, managing expectations
• 15. MNDM - Managing legacy liabilities in Ontario (Agnew Lake as a case study, but not necessarily restricted to uranium)
• Lunch
Workshop Day 2 - PM

- 16. LLRWMO - Other legacy sites (uranium and radium) in Canada
- 17. Country case study - uranium contaminated sites
- Short Break
- 18. Open discussions on the days issues
- 19. CNSC - Summary of discussions and table of issues
• Typically the weather will be cool but warming up.
• Safety boots are required by the companies for the tours.
• Around a 20% chance that there will still be ice on some lakes.
• **Hoping to see you all in Canada**
