Events

February 2014

Coordination Meeting
in February to draft
NNRP, Governance
and strategic approach
on GNSSN

March 2014

Ottawa Canada –
Consultancy Meeting to
finalize drafts and define
performance indicators for
the GNSSN outcomes

4th Steering Committee

Approved Documents:

1. GNSSN Term of Reference
2. NNRP Guide including the National contact Point Responsibilities
3. Revised GNSSN governance Plan
4. Updated GNSSN Action Plan
5. GNSSN Core Working Group ToR
6. IAEA Strategic Approach on GNSSN

Plenary Meeting

When?
September
2014

Who?
100 participants
from Member
States

What?

- Progress of GNSSN including the Nuclear Security Networks
- EU: Enhancing Global Nuclear Safety and Security
- Regional Network updates
- TSO: Promoting science-based safety

Plenary Meeting

When?
September
2014

Who?
100 participants
from Member
States

What?

- Progress of GNSSN including the Nuclear Security Networks
- EU: Enhancing Global Nuclear Safety and Security
- Regional Network updates
- TSO: Promoting science-based safety

Plenary Meeting Discussion

- Explore the role of TSOs in the preparedness phase
- Disseminate to Member States lessons learned from the Fukushima Daiichi accident for further progression and implementation in the national safety and security infrastructure
- Effective collaboration with universities and research institutions is the key to promote excellence in nuclear safety and security education
 - Interface between safety and security

Plenary Meeting Discussion

- Explore the role of TSOs in the preparedness phase
- Disseminate to Member States lessons learned from the Fukushima Daiichi accident for further progression and implementation in the national safety and security infrastructure
- Effective collaboration with universities and research institutions is the key to promote excellence in nuclear safety and security education
- Interface between safety and security

Coordination Meeting

Purpose

Play a central role in the capacity building and assistance programs addressed to African and Arab countries

Involve donor countries in the draft and future implementation on the action plans.

To harmonize action plans between both regions

Coordination Meeting

Purpose

Play a central role in the capacity building and assistance programs addressed to African and Arab countries

Involve donor countries in the draft and future implementation on the action plans.

To harmonize action plans between both regions

Coordination Meeting

The diagram features a large white circle on a blue background with a network pattern. Inside the circle, the word 'OUTCOMES' is centered. Two arrows point from 'OUTCOMES' towards the text 'Coordination Meeting' at the top. Below 'OUTCOMES' are three white rectangular boxes with blue borders, each containing a specific outcome. The boxes are arranged with two on the left and one centered below them.

OUTCOMES

Avoid overlap
and
duplication
of the
implemented
activities.

Efficient delivery of
CB programs and a
bigger impact in the
recipient countries.

Enhanced cooperation
and harmonized
approaches

RECOMMENDATIONS

Improvement in the Development of:

Planning process
between regional
networks and the
different IAEA
organizational units.

Action Plans,
developed on a 3
years basis and to
be connected to a
midterm plan

Action Plans
focusing on real
needs. Regional
networks need to
develop evaluation/
assessment tools
for the regional
need focusing on
practical tasks

Nuclear security
networks and
nuclear safety
networks
integration

RECOMMENDATIONS

Improvement and Development:

- The public web parts of ANNuR and FNRBA.
- EP-net and the regional topical groups on emergency preparedness and response need to be connected reasonably.
- Security culture needs to be further considered in the planning phase of security work plans.
- Regional networks need to enhance their visibility and promote the work of their members e.g. release of Newsletters.
