

GNSSN

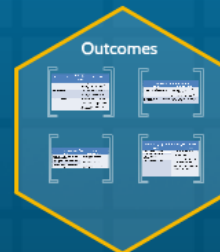

IAEA Strategic approach

According to the IAEA's Statute, one of the main functions of the Agency is "To foster the exchange of scientific and technical information on peaceful uses of atomic energy" (ARTICLE III, para. 3).

Strategic approach

	Vision			
	Outcomes / Performance indicators			
Strategic goals	Enhance networking and cooperation within and among Member States and networks	Establish and maintain a strong platform for sharing technical knowledge	Enhance competence in nuclear safety and security	Achieve high level of nuclear safety and security through a harmonised approach to capacity building
Operating Mechanisms	Promote GNSSN	Foster Commitment	Develop Actions	Build Capacity
Enablers	People			
	Infrastructure			
	Finance			
Operating Principles	Global	Flexible	Results-based	
	Inclusive	Self-initiating		
			Transparent	

Vision

The GNSSN is the world gateway to sharing nuclear safety and security knowledge and services in order to facilitate capacity building among Member States.

Mission

Sharing information and knowledge – Ensuring that relevant knowledge, experience and lessons learned related to nuclear safety and security are managed and shared for the benefit of Member States.

Facilitate multilateral cooperation and coordination – Enabling and supporting collaboration and interaction between organizations and subject matter experts.

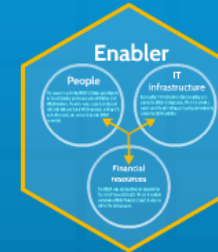

Building Capacity – Establish a capacity building framework to support the national nuclear safety and security infrastructure in the Member States.

security**

4

**Achieve high level of nuclear
safety and security through a
harmonized approach to capacity
building.**

Operating Mechanisms

Promote the GNSSN

Implement outreach activities in line with the GNSSN communication plan, with a focus on promoting awareness of the GNSSF and the GNSSN.

Foster Commitment

Develop national, regional and global activities that incorporate Member States' and other stakeholders' interaction with the GNSSN management.

Develop Actions

Develop focused activities with the purpose of developing actions towards nuclear safety and security capacity building.

Build Capacity

Targeted development of individuals, organizations and participating Member States in disciplines needed to achieve a high level of nuclear safety and security infrastructure.

Strategic Goals and Operating Mechanisms

Promote the GNSSN

Implement outreach activities in line with the GNSSN communication plan, with a focus on promoting awareness of the GNSSF and the GNSSN.

Foster Commitment

Develop national, regional and global activities that incorporate Member States' and other stakeholders' interaction with the GNSSN management.

Develop Actions

Develop focused activities with the purpose of developing actions towards nuclear safety and security capacity building.

Build Capacity

Targeted development of individuals, organizations and participating Member States in disciplines needed to achieve a high level of nuclear safety and security infrastructure.

Strategic Goals and Operating Mechanisms

Operating Principles

Global

The GNSSN plays an essential role by ensuring that the world's nuclear safety and security related knowledge resources are visible and available to those who need them, in a format they can access and use.

Inclusive

Participation in the planning and implementation is open to all IAEA Member States.

Self-initiating

Effective planning and implementation of cooperative activities, especially those in the area of capacity building, are made on the basis of participating Member States' and other stakeholders' initiative.

Flexible

The GNSSN accommodates the diversity and complexity of national nuclear safety and security infrastructures, as well as the factors determining their effectiveness.

Results-based

The GNSSN operation is practical and results-based. Lessons learned are documented in order to ensure continuous improvement.

Transparent

The GNSSN operation promotes trust among members, and shares information and knowledge in an open and transparent manner.

Self-initiating

Effective planning and implementation of cooperative activities, especially those in the area of capacity building, are made on the basis of participating Member States' and other stakeholders' initiative.

Transparent

The GNSSN operation promotes trust among members, and shares information and knowledge in an open and transparent manner.

Enabler

People

The success in achieving GNSSN strategic goals depends on the outstanding performance and contribution of all GNSSN members. We aim to value, support, develop and utilise the full potential of GNSSN members, working with each other across our community to make GNSNS successful.

IT infrastructure

High-quality IT infrastructure is key to enabling us to achieve the GNSSN strategic goals. We aim to provide a modern and efficient working and learning environment to sustain the GNSSN activities.

Financial resources

The GNSSN aims and objectives are dependent on the overall financial strength. We aim to maintain and enhance GNSSN financial strength in order to deliver the strategic goals.

Outcomes

Strategic Goal 1: Enhanced networking and cooperation within and among Member States and networks	
Outcomes	Performance Indicators
Effective networking	Number of forum discussion leading to consensus among member states participants.
Active engagement	Number of forum discussion generated in follow-up to specific networks activities and leading to broad based discussion among MSE.
Increased cooperation	Use available web analytics to determine: number of countries, top searches, number of searches, number of requests for registered users, number of registered users, traffic sources, number of pages viewed per visit.

Strategic Goal 2: Strong platform for the exchange of technical knowledge	
Outcomes	Performance Indicators
Established, working platform for the exchange of technical knowledge and information	- Number of National Nuclear Regulatory Portals (NNRPs) developed and - Number of NNRPs updated - Trends (for all above) monitored by annual survey(s) to track progress
Continued enhancement and upgrades to the GNSSN platform	Track the annual commitment(s) of the IAEA, MS and RRs to the GNSSN and/or their web portals.

Strategic Goal 3: Enhanced competence in nuclear safety and security	
Outcomes	Performance Indicators
Assessment and identification of gaps on required competencies	- Number of training activities and participants.
Develop competence in nuclear safety and security	- Number of topics addressed.
Demonstrated competence in nuclear safety and security	- Number of activities related to thematic working groups.

Strategic Goal 4: Achieve the highest level of nuclear safety and security through a harmonized [holistic] approach to capacity building.	
Outcomes	Performance Indicators
Develop inventory of resources	- Number of capacity building self-assessment and/or peer review missions conducted.
Establish centres of excellence	
Develop central repositories of information	
Develop inventories of learning opportunities	- Feedback provided by Member States through evaluation surveys conducted to assess networks' contribution to the national and regional nuclear safety infrastructure development.

Strategic Goal 1:
Enhanced networking and cooperation within and among Member States and networks

Outcomes	Performance Indicators
Effective networking	Number of forum discussion leading to consensus among member states participants.
Active engagement	Number of forum discussion generated in follow-up to specific networks activities and leading to broad-based discussion among MSs.
Increased cooperation	Use available web analytics to determine: number of countries, top searches, number of searches, number of requests for registered users, number of registered users, traffic sources, number of pages viewed per visit.

Strategic Goal 2:
Strong platform for the exchange of technical knowledge

Outcomes	Performance Indicators
Established, working platform for the exchange of technical knowledge and information	- Number of National Nuclear Regulatory Portals (NNRPs) developed and - Number of NNRPs updated - Trends (for all above) monitored by annual survey(s) to track progress
Continued enhancement and upgrades to the GNSSN platform	Track the annual commitment(s) of the IAEA, MS and RNs to the GNSSN and/or their web portals.

Strategic Goal 3:
Enhanced competence in nuclear safety and security

Outcomes

Assessment and identification of gaps on required competencies

Develop competence in nuclear safety and security

Demonstrated competence in nuclear safety and security

Performance Indicators

- Number of training activities and participants.
- Number of topics addressed.
- Number of activities related to thematic working groups.

Strategic Goal 4:

Achieve the highest level of nuclear safety and security through a harmonized [holistic] approach to capacity building.

Outcomes

Develop inventory of resources

Establish centres of excellence

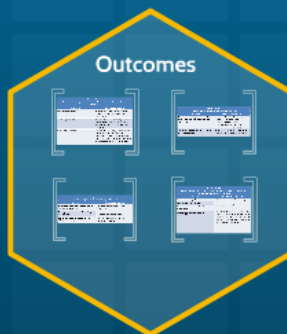

Develop central repositories of information

Develop inventories of learning opportunities

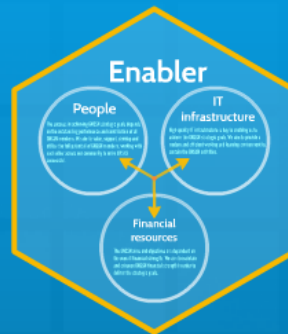

Performance Indicators

- Number of capacity building self-assessment and/or peer review missions conducted.
- Feedback provided by Member States through evaluation surveys conducted to assess networks' contribution to the national and regional nuclear safety infrastructure development.
