The screenshot displays the Microsoft Office 365 interface. The top navigation bar includes 'Office 365', 'BROWSE', 'FILES', 'LIBRARY', and 'Marketing Campaigns'. The left sidebar shows 'Home', 'Notebook', 'Documents', 'Recent', 'Tasks', 'Pictures', 'Mailbox', 'Site Contents', and 'EDIT LINKS'. The main area shows the 'Documents' library with a list of files. A callout box points to the 'Find a file' search bar with the text 'Drag and drop content into SharePoint'. Another callout box points to the 'EDIT LINKS' button with the text 'Edit, share or follow documents with one click'. A document titled 'California Q3 and Q4 Marketing Campaign' is selected, and its preview is shown. The preview includes a title slide, a navigation bar, and a list of contributors. A callout box points to the 'Live document previews' feature. Another callout box points to the 'Track who you're sharing with' feature, which shows a list of users who have viewed the document.

The image shows a screenshot of the Microsoft website layout. At the top, there's a navigation bar with several links: "Share the latest news and information", "Get feedback with an executive blog", "news & events", "campus", "employee matters", and "Legal". Below this, the main content area is divided into several sections. On the left, there's a "NEWS HEADLINES" section. In the center, there's a large article titled "Microsoft Brings Multitouch Screens to the Big Time" with a photo of a person interacting with a large screen. To the right of the main article, there's a "TOP STORIES" section with links to various news items. At the bottom, there's a "FIND IT FAST" section with links to various site features.

SharePoint@IAEA: Knowledge Management

Create and maintain taxonomies and knowledge graphs

“URification” of all types of things

Linking and mapping between taxonomies and various graphs

Access knowledge graphs via API (Read/Write)

Support of collaborative workflows around taxonomy management

Extraction of ‘things’ (entities) from any kind of text based on knowledge graphs

Extraction of (free) terms from any kind of text

Categorization of text

Ultra-fast auto completion based on knowledge graphs

Integrated with highly scalable graph databases

Integration layer to improve content and collaboration systems

Existing integrations with SharePoint, Drupal, Confluence

Provision of user-dialogues to support semi-automatic tagging

Semantic indexing based on URIs, faceted search based on taxonomies

Content recommender services

SharePoint@IAEA: E-Learning

Candidate Solution #1: **LMS365**

Features:

- Course Creator (SCORM-compliant)
- Course Catalog
- SCORM Player, Office docs support
- My Learning
- Administration & Reporting

SharePoint

SharePoint@IAEA: E-Learning

Candidate Solution #2: **SHAREKnowledge LMS**

Features:

- Course Catalog, Assignment, Personalization
- SCORM Player, Office docs support
- My Learning
- Curriculum & Course Management
- Grading & Reporting

SharePoint

Thank you
