T&T the initiative

List of training is decided by EC service at the signature of the contract but there is a certain flexibility based on the needs.

The EC support to the pilot school is the result of a common interest by both institution for the Nuclear Safety and the willingness to cooperation on concrete activities.

As a consequence the IEAE, ENSTTI (contractor of EC) and EC have decided to work together. The main responsibility of the EC (T&T) is to financially support the first pilot course in Nice (INSC beneficiaries).

Depending of the results due consideration for follow-up activities

Conclusions

The success of T&T is growing

The " IEAE-EC "pilot school" is an evidence on the cooperation of both institutions which can react with flexibility.....

Good luck to ENSTTI in the implementation!

Thank you
