

# International Conference on Topical Issues in Nuclear Installation Safety

## Safety Demonstration of Advanced Water Cooled Nuclear Power Plants

6-9 June 2017  
Vienna, Austria

*Mark your Diary!*

Don't miss the 6th edition of this international topical issues conference, presenting leading edge knowledge and experience on:

- Safety assessment of advanced reactor designs, including Small Modular Reactors;
- Design safety principles;
- Licensing of advanced reactor designs and;
- Safety reinforcement of existing installations.

Reflecting on the challenges faced and lessons learned over the past 4 years, this conference will provide an opportunity for **regulators, operators, vendors, research institutes and technical support organisations** to strengthen international cooperation, competence and, ultimately, sustain improvements made globally through a series of interactive sessions and discussions.

The conference is **a must for professionals** working in the area of nuclear safety and design related to advanced reactors and nuclear power plants already in operation. Together, we will strengthen the safety of nuclear power reactors worldwide!
