1. Objectives

During the FNRBA consultancy meeting in Aug 2016, held in Vienna, Austria, key stakeholders of FNRBA (Steering Committee members, FNRBA TWG co-ordinators, IAEA Technical Officer and donors) discussed and agreed to consider the development of a collaborative platform to capture the needs from FNRBA member states.

The objectives of this platform are:

- **To collect the needs of FNRBA member States (equipment, technical advice, other...);**
- **To map the capabilities of FNRBA member States per category (competencies and infrastructures);**
- **To identify relevant support to the needs within FNRBA by matching the request with the relevant profiles;**
- **To facilitate support from other organizations when the mutual support cannot be feasible;**
- **To promote the utilization of the regional expertise, infrastructures and resources.**
