

Exercise

Please separate in two groups (Group A and Group B) of equal size

- At least one National representative per group
- Each group chooses:
 - one or several group slide preparing person(s)
 - one or several group spoke-person(s)

Both Groups take the point of view of a country :

- with a large Nuclear program (to be defined/described by the group)
- with a small “emerging” Nuclear program (to be defined/described by the group)

Both groups prepare brief analyses and justifications of strategies and policy choices answering the questions (75') :

- Spent Fuel Management or High Level Waste Management ? Reprocessing of spent fuel or direct disposal of spent fuel ?
- Interim storage practice and duration ? Interfaces with impact on other waste management steps (in particular disposal) ?
 - All aspects including technical, safety, public acceptance/perception, economic... may be included

Please prepare both cases with equal attention/details

The spoke-persons will present the outcome of the analyses to the other group and experts :

- 15 minutes presentations + 15 minutes questions
