

Exercise

Please separate in two groups (Group A and Group B) of equal size

- At least one National representative per group
- Each group chooses:
 - One or several group slide preparing person(s)
 - Two spoke-person(s)

Groups prepare justifications and explanations for (75') :

- GROUP A - The design and construction of an interim storage for spent fuel (characteristics to be chosen and defined)
- GROUP B – The design and construction of an interim storage for high level waste (characteristics to be chosen and defined)

Each group takes the point of view and position of an implementer and of a regulator

- Please prepare both sets of justifications and explanations with equal attention/details

The two spoke-persons of each group will successively present the justifications of :

- The implementer (why the facility is needed, what are the design justifications, why is it located there...)
- The regulator (why it is safe, why it meets the regulatory requirements, what is needed for the next authorization step...)
 - 4 x (10 minutes presentations + 10 minutes questions)
