

Title: Consultancy meeting on question-sets for self-assessment against IAEA Safety Standards

Location: Austria, Vienna

Dates of Mission: 2013-02-01 (1 day)

Objectives:

The objective of this meeting was to develop a common understanding between the participants concerning the development of question-sets. The content included:

- Presentation of the self-assessment methodology;
- Discussion on the way to develop question-sets based on IAEA Safety Standards in order to facilitate the implementation of a self-assessment;
- Drafting of questions based on IAEA Safety Standards using SARIS template; and
- Discussion and review of the draft guidance on how to write questions for self-assessment.

Duties performed:

Develop a common understanding between the participants concerning the development of question-sets.

Conclusions:

The result of the discussion and review are reflected in the draft guidance on how to write questions for self-assessment.
