

**Title:** Expert Mission on Regulatory Framework for Nuclear Facilities and Self-Assessment based on SSG-16

**Location:** Egypt, Cairo

**Dates of Mission:** 2012-11-25 to 2012-11-29

**Objectives:**

To provide guidance and knowledge to the staff of the Egypt Nuclear and Radiological Regulatory Authority (ENRRA) with regards to performing core regulatory functions i.e. authorization, review and assessment and inspection and enforcement processes, based on relevant IAEA safety standards.  
To introduce the SSG-16 self-assessment methodology to the participants and to guide them during the exercise sessions.

**Duties performed:**

The mission consisted of two separate workshops. During the first workshop, which was on the functions and responsibilities of a regulatory body regarding a NP Programme, several presentations were delivered together with the other experts.

**Conclusions:**

The participants expressed the view that both workshops were very useful for the newly formed Egyptian regulatory body in developing its organizational setup for performing the regulatory responsibilities in a systematic manner and in assessing their current status from the SSG-16 point of view.
