

Title: National workshop on development of legislation and regulation for nuclear and radiation safety, licensing system

Location: Belarus, Minsk

Dates of Mission: 2012-10-16 to 2012-10-19

Objectives:

- To review the Belarus regulatory framework to support the introduction of nuclear power in Belarus;
- To develop a detailed plan for Belarus of updating and/or developing its regulations to support the NPP programme;
- To review the General Provisions Regulation and to provide specific areas for update.

Duties performed:

The workshop consisted of, *inter alia*, presentations on the programme and current regulatory situation in the Republic of Belarus; IAEA Safety Standards and oral reports by Belarus.

Conclusions:

The current workshop of the IAEA and the results obtained are estimated by the Belarusian side as extremely fruitful.
