

**Title:** National Workshop on the IAEA Self-Assessment for the Integrated Review of Infrastructure for Safety (IRIS) based on the Specific Safety Guide No 16 “Establishing the Safety Infrastructure for a Nuclear Power Programme”

**Location:** Malacca, Malaysia

**Dates of Mission:** 2013-12-16 to 2013-12-16

**Objectives:**

The purpose of this national workshop was to introduce participants to the IRIS (the Integrated Review of Infrastructure for Safety) self-assessment methodology and its respective software. This included a self-assessment exercise on the implementation of the self-assessment methodology as well as the use of the IRIS software.

**Duties performed:**

The national workshop consisted of expert presentations as well as the conduct of a self-assessment exercise based on a fictitious case study realized by the participants.

**Conclusions:**

The national workshop achieved its objectives and purpose by successfully introducing the IAEA IRIS self-assessment methodology and tool to the Malaysian participants.
