

Title: Regional Workshop on the Introduction of SSG-16 Self-Assessment Methodology and IRIS Software

Location: Vienna, Austria

Dates of Mission: 2013-05-06 to 2013-05-09

Objectives:

The purpose of the workshop was to develop an understanding and knowledge on SSG-16 and how to perform a self-assessment of the nuclear safety regulatory infrastructure based on SSG-16 by using the IRIS software and how to prepare an action plan accordingly.

Duties performed:

Presentations, exercises and discussions in two working groups. IAEA Safety Standards and SSG-16 were used as a main reference of the workshop.

Conclusions:

Participants became familiar with IRIS through the application of the self-assessment software and learned how to prepare an action plan.
