

Title: National Workshop to introduce the IAEA's Self-Assessment Tool based on SSG-16 provisions/ actions

Location: Philippines, Manila

Dates of Mission: 2012-12-17 to 2012-12-20

Objective:

To introduce the SSG-16 safety guide, SSG-16 self-assessment methodology and IRIS software.

Duties performed:

The workshop began with a presentation on “Introduction of SSG-16 IAEA Safety Guide”. In the presentation, the purpose and expected functions of the SSG-16, its scope, format and content, and its relation with other IAEA documents were outlined. A presentation introducing the SSG-16 Self-Assessment Methodology followed. After these two main presentations, a power point presentation to introduce the IRIS software was given, followed by an interactive introduction to the IRIS software and its features.

Conclusions:

The workshop offered an introduction of the SSG-16 specific safety guide, SSG-16 self-assessment and the relevant software tool, IRIS (Integrated Review of Infrastructure for Safety). The participants expressed the view that the workshop was very useful for them for assessing their status from the SSG-16 points of view in a systematic manner.

The event was carried out with funding by the European Union
